**Task**

Working in class/year groups, complete the table for your level. As a whole staff, fill in the sheet for each level.

Is there anything missing that is relevant to your school? If so, add in the blank row.

Are there any surprises? What implications can you see for the full participation of some students?

How does the school/staff support students to ensure full participation? What more could be done?

Can you identify any additional steps you could put in place to a class/school level?
